

Junior Wooden Coaster

Pink knuckles rides for the entire family

The reliability and time-tested technology of the Big Ones, but with a compact layout. Pink knuckles for the entire family, but still family-friendly. A balanced performance without too much lateral forces, but with a lot of speed. To sum it up: Junior coasters with senior thrills – that is the new junior edition of Cordes Coasters.

Cordes Junior Wooden Coasters offer all the advantages that you already know from Cordes Coasters. They are truly a chip of the old block, but with the entire family in mind. Construction, manufacture, equipment, trains and electronics are of the proven cordes-quality and are executed in partnership with Gerstlauer Amusement Rides. Everything is just a size smaller – while still upholding the same performance and valency. Just as long-lasting and reliable. Another ingenious piece from Cordes – the company that made Tripsdrill's "Mammut" plus several other world-class coasters wooden reality.

It is important for us that the entire family, including grandparents and children, can enjoy a ride on the Cordes Junior Wooden Coasters. The entire train course was optimized under this guideline. Strongly distinct g-forces are generally avoided, without abstaining from the characteristic "Shake, Rattle and Roll" that comes with a real Woodie. Because we love wooden roller coasters – the small ones just as much as the big ones.

Fact Sheet

- Height: ~49 ft. (15 meters)
- Length: ~1,591 ft. (485 meters)
- Maximum speed: ~37 mph (60 km/h)
- 3,0 G vertical
- 1,0 G lateral
- Required floor space: 154 x 233 ft.

And because you can never have enough wooden roller coasters, you can order a big Cordes and a Cordes Junior Coaster together for the first time ever – with a perfectly complementary layout and profile. This will thrill all your guests! – Made in Germany! We are looking forward to working with you!
